Our Values

Experience

Quantum's foundations lie in kitchen manufacturing knowledge and experience. In 1975, the first cabinet was built, and from there, Quantum was born. These bespoke kitchens have been cultivated by Quantum's highly respected CEO who grew up around the business, and the ever-expanding team.

Every Quantum kitchen is made to order, to ensure you receive durable, purpose-built cabinets. Each cabinet is crafted using a combination of state-of-the-art machinery and classic workmanship, resulting in both precision-built kitchens and exceptional quality. Quantum cabinets are all hand-assembled and undergo rigorous quality checks before leaving the premises.

Reliability

Each Quantum kitchen comes with a full 25-year guarantee on doors, drawers, cabinets and hinges. With coverage such as this, you're left with peace of mind that your kitchen is not only built to last, it is guaranteed to last.

Responsibility

Conscious of the environmental impact manufacturing can generate Quantum endeavours to only use wood materials sourced from well-maintained, sustainable forestry. Additionally, all wood waste created during the production of your kitchen is recycled as a source of energy, heating Quantum's factory and offices, consequently reducing our carbon footprint.

Origin

Origin is a beautiful, eclectic range of kitchens, covering modern, handleless profiles through to traditional shaker doors. With a wide range of styles, designs and finishes available, you can opt for a unique blend of doors to create a truly exceptional kitchen. This collection is incredibly versatile, extending itself beyond the kitchen and into living areas. From open, floating shelves to bench seating, you can cultivate the entirety of your home to suit your taste.

The furniture exhibited within the coming pages offer the capacity to not only accommodate your lifestyle choices, but to embrace them. No matter how you and your family operate, your kitchen design doesn't need to result in any compromise. Whether you're looking to include certain appliances, or would like to create a particular ambience within your home, this eclectic collection of door styles has been selected to provide you with flexibility and choice.

The design preferences and vision you have for your kitchen and other living areas can be transformed into a reality by a network of independent retailers. Each Quantum studio has been carefully chosen to provide you with a reliable, experienced team who are equipped to meet your unique needs.

Design Tip

The combination of colours you choose, whether in your doors or accessories, doesn't have to be contained to just the kitchen. They can also be extended to other areas of the home in the form of fitted furniture. With options such as floating shelves and television cabinets available, you can plan your storage throughout your house. Fitted furniture can be used as a bridge between the kitchen and living space, or as a deliberate interior design decision to ensure uniformity within the home.

The washed woodgrain effect doors project a laid-back feel, while the sculpted accessories ensure the design is kept modern. Plants and real wood accessories help to accentuate the homely, grounded feel of this Linden kitchen. Linden kitchens, with their wide range of colours and effects can create a multitude of looks, so no matter the kitchen style, this collection of doors is versatile enough to accommodate for any design.

Design Tip

Kitchen design is about more than just colours and door styles. Accessories, no matter how small, can make a significant impact upon the kitchen. Whether practical, or purely for aesthetic purposes, each addition contributes to the final look of the kitchen. Delicate spice drawers and oak trays introduce an element of luxury and warmth to the design, as well as supply a practical edge, freeing up space by integrating these items directly into the kitchen.

Design Tip

Your kitchen doesn't have to be confined to just one room. Every home is unique, and no matter your space or your needs, you can create an individual design perfect for your house. If your traditional kitchen space is too small, and you have room to accommodate, you can prioritise your kitchen and create a utility or practical pantry room for items you can't or do not want on display in your kitchen.
